

# m2p-labs | The Microbioreactor Company

m2p-labs is a worldwide leading supplier of microbioreactors. The company's product portfolio comprises the BioLector<sup>®</sup>, the RoboLector<sup>®</sup> (automation) and the disposable FlowerPlate<sup>®</sup> (MTP) which provide an intelligent micro fermentation platform for screening and bioprocess development. This technology enables customers to increase their number and information content of bacterial, yeast, fungi and cell culture experiments, as well as to conduct experiments with greater efficiency, better quality and lower cost than in any other cultivation platform.

## Develop your BioProcess in a couple of days.
