

France's *independent* multidisciplinary biotechnology *think-tank*

Building on France's largest **multidisciplinary life sciences network**, **AdebioTech** promotes interactions between the **industrial world** (SMEs and large companies), and the **academic** one in the field of biotechnology. The goal is to foster and support sustainable innovations.

AdebioTech activities are supported by **institutional representatives** (ministries, local authorities)

AdebioTech works across the entire biotechnology spectrum: human and animal **health**, **environment**, **energy**, **food/feed**, **cosmetics**, **industrial processes**... creating unprecedented but necessary synergies to overcome the challenge of innovation.

Missions

- Break down barriers** between disciplines or uses
- Support** existing industry sectors
- Create new industry sectors** and accelerate their development
- Contribute to the dialogue** between private and public bodies
- Overcome** scientific, technological, regulatory, and ethical **hurdles**

Actions

- Animation of working groups** leading to national / international scientific conferences in emerging areas with highly promising value and of strong societal impact
- Disseminate information** from AdebioTech events (studies, reports) and from members of AdebioTech
- Create networks** across public and private organisations including with regional and national governing bodies.

2015

The lipids of the future: lipases in the heart of scientific and industrial developments

Partners : *Soliance*

Stability and formulation of proteins and peptides: issues and applications

The air quality for the health

Partners : *CNRS, Ministère de l'Écologie, du Développement durable et de l'Énergie, Air liquide*

2014

Insects: a promising sector for biotechnology

Partners: *AgroParisTech, Vitagora, Ynsect*

Enzymes Innovations Industries

Partners: *DGE, TWB*

Endocrine Disruptors: Industrial, health and environmental issues

Partners: *BASF, INERIS, MEDDE, MENESR*

2013

Molecular biology applied to the Environment, serving industrial innovation

Partners: *Ademe, Bertin Technologies, BRGM, Ceeram, Veolia*

Technological innovation in industrial protein separation

Partners: *eKope, LFB, Novasep, Pall Life Sciences, PBE, Tereos Syral*

Regulation's impact on innovation and commercialisation of health products

Partners: *Alkapharm, DGE*

2012

Peptides derived from the hydrolysis processes: industrial chains

Partners: *DGE, Ingredia, Roquette Frères, SFGP*

Business access to new biology and health research infrastructure

Partners: *MENESR*

Biorefining of industrial and environmental byproducts

Partners: *ARD, Fermentalg, MEDDE, Pole IAR, Veolia*

2011
